InfoDoc 35118 / 2019 / Issue in Asset balances report S_ALR_87010124 / SAP Delivered Support

Communication

Info to SAP 29.01.2019 15:12:00 ***
Hello *
Your answer is not satisfactory, please test the same report in 1610 FP00 or any other ERP system as well.
We never faced this issue in ERP or S/4H 1610 FP00.
We are facing this issue after upgrade to SP04. You can see the last screen shot of the attached document, which is from our FP00 release system (C12 sandbox), where there are no Zero valued assets displayed.
We are expecting a fix from you as soon as possible.
Thanks

Dear *
We have been checking in our internal systems and the behavior you report is the correct one.
The assets that do not have any acquisition done are displayed in this report also.
That is the standard behavior.
The logic of this report is to display all existing assets, no matter what values have.
Best regards,
*

Info to SAP 28.01.2019 16:35:59 ***
Hello,
May I know the updates on this issue?
Thanks

Problem Description 18.01.2019 18:57:07 ***
Hello SAP,
We recently upgraded our S/4H 1610 system from FP00 to SP04. After go-live we are facing issue in Asset balances report S_ALR_87010124. This report is showing all deactivated assets with zero balance as well. Before we did not face this issue in FP00.
Please find attached document (Issue in asset balances report.docx) for more details. It is a critical report for us and I request you to fix this issue as soon as possible.
Thanks
